

# MEGA-RESTER™

## Industrial Water Hammer Arrester

## Engineered for Industrial Applications.

*The pressurized air cushion is permanently separated with a dual o-ring piston from the water system.*

- Controls damaging pressure surges caused by quick closing valves in piping systems.
- Perfect for industrial equipment, food processing, commercial laundry equipment, pumping systems, irrigation and waste treatment systems.
- Available in copper or stainless steel for any application.
- Liquid-filled gauge and air filler valve for jobsite charging.
- Sized and charged by our computer to fit your specific job requirements.
