

Sioux Chief Ox Box Testimonial

Sioux Chief's Ox Box is ideal for outlet box installation. The metal box clip can be "squeezed" to hold the Ox Box over a stud while making final measurements. Over a stud resulted in a rock-solid installation.

Ox Box also offers more mounting options than any other box on the market.

Sioux Chief has done a great job of designing a product that eliminates crooked boxes and having to cross over DWV and water piping. Two boxes really are stronger than one.

Additionally, the Ox Box is made of thick ABS plastic. It is the box of choice in the washing machine and icemaker outlet applications at Jenter, Inc.

This is the only box we will use!

Thank you,

William G. Barrett
