

To Sioux Chief:

In regards to the Ox Box, we have used over a hundred of these already and will continue to use this product. We find the Ox Box to be a time saver at installation.

The many options make it convenient, especially in areas where the studs are not in the right area. With other boxes on the market, studs may have to be moved or worse removed. With the Ox Boxes 2 box set-up we can put them wherever the studs are. We have no need to move studs on the rough.

We are also looking forward to Sioux Chief coming out with a ice maker box for CPVC with a 6' stainless steel hose.

Sincerely,

Paul Price
