

NEW PRODUCT ANNOUNCEMENT

To: Sioux Chief Representatives
 Date: March 23, 2009
 Subject: **Stainless Steel Strainers for Fat Max™**

The new stainless steel strainers for our Fat Max™ large-capacity floor drains are now in stock and ready to ship. These new models are very similar to our current nickel-bronze strainers, but are cast in 304 Series stainless steel and have a shot-blast finish.

304 stainless steel strainers are often specified in food-prep areas, commercial kitchens, dairies, chemical/medical areas, or other applications where strength and corrosion resistance are key features.
