

On site. | On time. | On the money.

One Wellington Road Lincoln, RI 02865

October 9, 2007

To Whom It May Concern:

The Ox Box manufactured by Sioux Chief has been a big help during the rough-in stage of a laundry box. Its flexible installation over a stud makes plenty of room for the plumbing. Other laundry boxes force you to install the drainage and water piping all between the same two studs; the Ox Box allows you the convenience of installing the water piping between two other studs.

The Ox Box comes with many variations of securing the box to the studs. Since most plumbers are not carpenters, the available mounting brackets with their numerous applications are a big time, and money saver for the contractor and his client.

Sioux Chief's higher quality and unmatched guarantee makes the Ox Box a long needed and happily received laundry box.

Sincerely

A handwritten signature in black ink, appearing to read "Richard Weber". The signature is fluid and cursive.
