

To Whom It May Concern:

I wanted to let you know that the Ox Box has been a lifesaver for us. It is a lot more versatile than your normal laundry box. Not only will the icemaker and laundry trim interchange but also with the laundry box you can separate the water and drain supplies. We can actually put the water lines on one wall and the drain on another wall if need be.

We also like the way it is supported. You can use the bracket on the center of a stud or the rail to secure it. A normal laundry box flexes in the wall and builders were complaining about that. This box does not do that. It looks a lot more appealing to the owner. Not only that but it saves us time on the install.

Thanks a lot,
