

"I just had to tell you how great of a product you have.

I work at the Kelly Supply store in Pella, Iowa. I was about to remodel my bathroom and I knew that when I leveled the floor up the old cast iron toilet drain and flange would then be below the floor. The budget wasn't going to allow for new drain lines so I found your Push-Tite Gasketed Flange (887-GPM) in your catalog. I called your company and a real nice lady (I'm sorry, but I can't remember whom) said that she could get one sent out as a sample. She did and when it came time to install it it couldn't have went better! It sure solved what could have been an awful problem.

Again, I just wanted to let you know that you have some great products and helpful employees! I'll be sure to mention this product to the people that purchase here as it would have to be a good seller!"
