Customer Testimonial from:

W. Michael Cox  
Vice President  
Systemaire, Inc.  
Earth City, MO

"After seeing the presentation on the **"Finish Line"** products, I was immediately impressed and could see the definite benefits of this product.

We are currently using "Finish Line" floor drains and floor cleanouts on three (3) "Gold's Gyms" in the St. Louis area. Gold's specifications call for square top drains and cleanouts. Trying to get the square tops right on the rough-in and keeping them square during the concrete pour is almost impossible. Both the General Contractor and the Tile Flooring contractor love the idea of being able to set the tops at the same time as the ceramic tile installation. This guarantees exact height and squareness of the drains with the finish floor.

My plumbers love the "Finish Line" drains for the fact that they don't have to spend hours on the floor trying to clean concrete and/or protective duct tape off the drain tops at the finish portion of the job. Plus they don't have to spend time raising or lowering the drain tops due to improper concrete to drain body finish.

The "Finish Line" drains and cleanouts are now our first choice for all of our Design/Build projects."
