

Sioux Chief Launches FastTrack Trench Drain System

Sioux Chief's new FastTrack pre-sloped trench drain system is fast and versatile. Available with sloped and neutral HDPE channels, the FastTrack's design incorporates a variety of features that make it simple, durable, and easier to install.

KANSAS CITY, MO, May 21, 2015 – Rough plumbing manufacturer, **Sioux Chief**, announced the launch of its new pre-sloped trench drain system, **FastTrack**, which incorporates a variety of features that make it simple, durable, and easier to install.

The new system represents an entirely new category in their drainage offering and is the result of many months of design and development.

FastTrack sections are 72" long, made from durable, UV-resistant HDPE material, and include slide-to-align construction covers and stainless steel grate anchors. Each section is molded with solid tongue-in-groove channel joints, integral rebar clips, and a bottom outlet. Both sloped and neutral sections are available, as well as a variety of grate options and other accessories.

“The FastTrack will be a great addition to our Drainage product line,” said Vice President of Sales and Marketing, Rex Baer. “We hope it will increase our overall success in the light commercial market.”

Typical applications will include parking and loading areas, paved outdoor pedestrian areas, warehouse and production facilities, commercial kitchen and food-processing areas, athletic fields, gas and auto-service stations, and many other uses.

More About Sioux Chief:

Since 1957, Sioux Chief has manufactured innovative plumbing products. It is a leader in providing rough plumbing solutions for residential, commercial, industrial and government applications. Sioux Chief's comprehensive product line is comprised of three core groups: Supply, Drainage and Support. Sioux Chief products are sold to qualified wholesale distributors and retailers worldwide. The company is headquartered in Peculiar, Missouri — just outside of Kansas City.
