

## Sioux Chief Launches StrongArm™ Product Video

*Hailed for savings directly related to installation and labor time, Sioux Chief's StrongArm bracketing systems provide a clean and strong solution for Stub Outs. Sioux Chief's StrongArm video demonstrates the high quality and versatility of the product.*

**Kansas City, Missouri - January 07, 2014** – Rough plumbing manufacturer, Sioux Chief, announced the launch of its new **StrongArm product video** that enables plumbing contractors and wholesalers to know more about Sioux Chief design innovation, product features and installation techniques.

Each **StrongArm** is pre-assembled with either one or two LockBlocks™ or PEX Bend Supports for toilet, lavatory, sinks or hose bib Stub Outs. Sioux Chief offers many options that allow the brackets to be mounted to the face of the studs, inside the stud cavity or directly to the pipe vent.

“The StrongArm bracketing system was created because plumbing contractors who install PEX tubing and other flexible pipe materials told us they needed a very secure bracketing system – something that sheetrockers can't tear up and that also removes the torch from the job site.” Said Rex Baer, Vice President of Product Development at Sioux Chief.

Key features of the StrongArm are:

- Rigidly secures to any copper, PEX or CPVC CTS Stub Out and prevents any movement
- Versatile for 16" and 24" stud bays with either one or two pre-installed LockBlock devices
- Eliminates the need to solder Stub Outs
- Removes the risk that Stub Outs will be damaged by other trades

The new Sioux Chief rough plumbing video series offers plumbing contractors need-to-know information about time, labor and money saving innovations in Sioux Chief's Supply, Drainage and Support categories.

**Sioux Chief products** are sold through wholesale plumbing distributors nationwide.
