

## Sioux Chief Announces New Tile-In Drain Head for 821 Series Shower Pan Drains

Sioux Chief has released the new, **Tile-In drain head** for 821 Series shower pan drains. The Tile-In head installs just like a standard drain head with a strainer, works well with any shower trim finish and provides an attractive, seamless look to the shower floor. The Tile-In head is the newest product addition to Sioux Chief's complete line of shower drains.

**Kansas City, Missouri - September 18, 2014** – Rough plumbing manufacturer, **Sioux Chief**, introduced the Tile-In head for its 821 Series shower pan drains as part of its continuing effort to provide the most complete line of **shower drains** on the market.

The Tile-In head is a two-piece, stainless steel head that threads into the clamping collar of the **821 shower pan drain**, like a standard drain head. No special tools or techniques are needed. The removable tile insert "tray" sets inside the outer/lower drain head and provides a square drainage slot between the two pieces. A piece of shower floor tile is set into the tray to provide an attractive, seamless look to the shower floor.

In addition to the seamless, contemporary appearance, the Tile-In head eliminates the need to match the strainer finish to the valve trim finish.

"With the Tile-In style drain head, there's no need to consider the finish of the shower trim. Whether it's satin nickel, oil-rubbed bronze or chrome, the Tile-In head works equally well with any finish. Even if the trim finish changes, with the Tile-In head it's no problem," said Chris Ismert, Sioux Chief Product Group Director for Drainage.

The Tile-In head is available complete with an 821 drain body or is sold separately.
