

Customer Memo – Product Update

Subject: OxBox™ – New Replaceable Valves

Date: April 2019

Sioux Chief's industry-leading OxBox™ family of supply access boxes is now being shipped with new, patented replaceable valves.

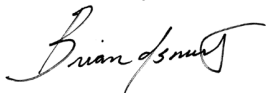

The new valves are **Universally** replaceable – so they can be replaced with any standard valve having a 5/8" O.D. compression thread. Replacements are fast and easy, with no special tools needed. Valves feature plated, c69300 brass bodies, which are SCC and dezincification resistant, and all valves include nylon test caps to protect the outlet threads and resist tampering. A full line of supply and outlet connections are available, as well as optional MiniResters™ for applications where water hammer arresters are required.

New valves will be phased in on all 696 Series OxBox products, including laundry, ice maker, toilet, lavatory, and other supply boxes. Depending on stock levels, customers should begin seeing the new valves in the next few weeks.

See the Sioux Chief website [HERE](#) for updated spec sheets. A flyer is also available and can be found under the [Brochures] tab on product web pages.

If you have any questions, please contact your local Sioux Chief Representative any time.

Sincerely

Brian Ismert
Director of Product Development

Replaceable Valves - now standard
in all OxBox™ Access Products
