

# Customer Memo – Product Introduction

**Subject:** PEX Multiport Tees

**Date:** May 2019

Sioux Chief introduces the newest addition to the PowerPEX® family of PEX fittings. Multiport tees for ASTM F1807 and F1960 systems are now available. These tees are made from top-quality, C69300 brass material, which is No Lead compliant and resistant to dezincification and stress-corrosion cracking. Several trunk and branch patterns are available to suit most applications.

Multiport tees are commonly used to distribute water supply to “groups” of plumbing fixtures – like a bathroom or kitchen group. They are also an ideal alternative for some slab manifold applications.

The new 672XGT Series multiport tees are listed on the current price index.

F1807 Product information can be found on our website [HERE](#)

F1960 Product information can be found on our website [HERE](#)

Item	Description	Min	Case
<b>ASTM F1807 PEX</b>			
672XGT0390	F1807 Multiport tee - (3) 1/2" branches, (1) 3/4" trunk end	10	100
