

Customer Memo - Product Introduction

Subject: StreamLine™ Job-Adjustable Linear Shower Drain

Date: December 2018

Sioux Chief introduces the newest addition to our linear shower drain offering. The 823 Series StreamLine™ Job-Adjustable linear shower drain is now available.

This new linear drain allows the installer to cut the channel to length on the jobsite, making it perfect for custom jobs, or retro-fit applications. In addition, since the channels are fabricated on site, the outlet can be located anywhere along the channel length, providing installation versatility.

Kits are available with either 36" or 72" long channels, and include a polymer channel with construction cover, outlet fitting, end caps, stainless steel strainer, and drain body with clamping collar and DoubleDuty™ test plug. Installation instructions are provided with each drain kit.

Installation instructions, spec sheet, and brochure are also available for download on the website [HERE](#)

If you have any questions, please contact me or your Regional Sales Support team any time.

Sincerely

Chris Ismert
